

The Most Awesome Protagonist

Multi-instrumentalist and author of San Francisco's ultimate DIY project, The Most Awesome Protagonist, **Mikey O'Connor** specializes in songs as powerful and haunting as they are thoroughly enjoyable. His latest album, "The Notable Agoraphobics EP" showcases six songs ranging from fully backed **pop ballads to lo-fi acoustic tracks**, all featuring O'Connor's characteristic **multi-part vocal harmonies**. Influenced by such tragic songwriters as **Daniel Johnston** and **Elliott Smith**, O'Connor tells stories of isolation and daily misery eased by love or fueled by alcohol. With his songs as skillfully varied as the instruments he plays, and the self release of his fourth EP on the way, The Most Awesome Protagonist continues as a persuasive force in the independent scene he has come to epitomize.

"Sounds kind of like it's on crack or that someone hit the 45 rpm setting on the record player accidentally, but the lovely vocals and the nice timing of the song keep it tame and very listenable. Definitely check it out, and watch out for that EP in January."

"The Most Awesome Protagonist sounds as if Ted Leo got all sloppy on uppers, and maybe didn't sleep for a week or two — in a good way. O'Connor's energy, mixed with his love of everything from Elliott Smith to Stevie Wonder, spliced with his affinity for mid '90s alterna-pop, makes for some pretty entertaining tunes."
